

Technical Specification

The BluePadel Eye is a non-invasive dual-camera unit that reconstructs the ball in 3D and applies the padel rules to produce an automatic, trusted score. This document sets out the hardware specification, optical envelope and the mounting interface for the carbon-fibre arm.

1 Overview

Two cameras per court on non-invasive mounts feed the perception pipeline.

2 Optical envelope

Reprojection RMS target under 10 px across the full court volume.

3 Mounting

Fixed optical pose; calibration is re-run whenever the arm is fitted.
